

12AYM-WET Series

REBORN POWER AND QUALITY | LONG STROKE | IMO Tier II Compliant | Mechanical Engine Control

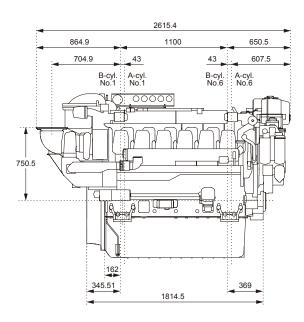

| Configuration | V-type, vertical, water-cooled, 4-cycle diesel engine |
|------------------------------------|--|
| Maximum output at crankshaft | M: 1220 kW@1900 rpm [1659 mhp@1900 rpm] |
| | H: 1140 kW@1840 rpm [1550 mhp@1840 rpm] |
| Displacement | 40.76 ltr |
| Bore x stroke | 155 mm × 180 mm |
| Cylinders | 12 V-type |
| Combustion system | Direct injection |
| Starting system | Electric starting motor [DC 24V - 6.5 kW] \times 2 or air motor \times 2 |
| Flywheel housing size | SAE #00, 21 inch |
| Turbocharging system | Exhaust gas turbocharger [with air cooler] TD13M |
| Cooling system | Constant high temperature cooling system |
| Cooling fresh water capacity | 211 ltr [jacket] |
| Lubrication system | Wet sump system, forced lubrication by gear pump |
| Lubricating oil capacity | Max.: 170 ltr Min.: 110 ltr [sump tank] [in engine piping line: 25 ltr] |
| Lubricating oil grade | SAE40 or SAE15W-40 |
| Direction of rotation [crankshaft] | Counterclockwise, when viewed from the flywheel side |
| Dry weight without gear | 4870 kg [without Fresh water cooler] |
| Environmental | IMO Tier II |
| Fuel consumption [at rated output] | M: 217 + 5% gr/kW hr [without marine gear] |
| | H: 212 + 5% gr/kW hr [without marine gear] |
| | |

DIMENSIONS [UNIT: MM]

Right side view, engine only

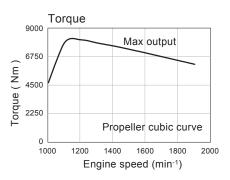

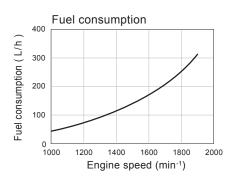

PERFORMANCE CURVES

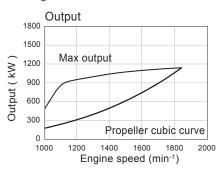

M-rating

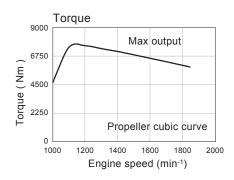

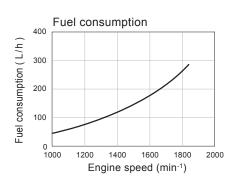

H-rating

Rating definitions: hp= 0.7355 kW Ratings are based on conditions of 100 kPa, 30% relative humidity at 25 °C.

M= For applications where use of rated power is less than 10 hours continuous out of every 16 hours and operation is less than 3000 hours per year. When combined with a correctly matched propeller which allows the engine rated rpm to be achieved in a fully loaded vessel state, the reduced-power operation can be at or below 60 rpm of the rated speed.

H= For applications where use of rated power is less than 24 hours continuous out of every 30 hours and operation is less than 4000 hours per year. When combined with a correctly matched propeller which allows the engine rated rpm to be achieved in a fully loaded vessel state, the reduced-power operation can be at or below 60 rpm of the rated speed. Fuel rates: Specific gravity 0.835 g/cc, low calorific value 42700 kj/kg [10200kcal/kg], Cetane No. 45.
